Professional Summary

Dedicated Java Fullstack with 3+ years of experience in developing scalable RESTful APIs using Java Spring Boot and Quarkus. Skilled in database management (PostgreSQL, Oracle) and CI/CD deployment Gitlab, with a proven track record of optimizing system performance.

About Me

Dedicated Java Fullstack with 3+ years of experience in developing scalable RESTful APIs using Java Spring Boot and Quarkus. Skilled in database management (PostgreSQL, Oracle) and CI/CD deployment, with a proven track record of optimizing system performance.

Skills & Competencies

- **Backend**: REST API Development (Java Spring Boot & Quarkus - Intermediate), TIBCO (Basic)
- **DevOps**: Basic Docker Usage, Code Management with Git & GitLab (Intermediate), GitLab CI/CD (Basic)
- **Testing & Tools**: API Testing with Postman (Intermediate), UI Development (Vue.js & Google Web Toolkit - Basic)
- **Networking**: Network Topology Design (LAN, MAN, WAN - Basic)
- **Server Management**: Remote Server Management (WinSCP, Ubuntu, Remote Desktop, Tailscale, SSH, Local Domain)
- **Databases**: PostgreSQL, Oracle (Intermediate)

Experience

PT TOGI Indonesia

DCI Indonesia Tbk (Maret 2026 – Agustus 2026) HSE-PORTAL – SDCOS – COREX

- Develop Web Aplication from scratch using java spring boot, integrastion using api, and design database model use Maria DB and Postgrsql, testing web Aplication.

PT FAN 360

Indomarco (October 2025 – February 2026) Klik-order-food – klik-order-view

- Created and managed tables, views, functions, and cursors in PostgreSQL and Elastic Search. Developed REST APIs using Java Spring Boot.
- Conducted API testing with Postman.

Mitra Utama Solusi Teknologi
AP2T (October 2023 – Juli 2025)
NEWITO - REC - SEMAR - SAKTI

- Created and managed tables, views, functions, and cursors in PostgreSQL and Oracle Databases.
- Developed REST APIs and schedulers using Java Spring Boot and Quarkus.
- Pushed REST APIs from personal branches to the development branch using GitLab Repository.
- Conducted API testing with Postman and supported UI development with Vue.js and Google Web Toolkit.

Mega Giga Solusindo
AP2T (October 2022 - October 2023)
NEWITO – EV2GO

- Created and managed tables, views, functions, and cursors in PostgreSQL and Oracle Databases.
- Developed REST APIs and schedulers using Java Spring Boot and Quarkus
- Pushed REST APIs from personal branches to the development branch using GitLab Repository.
- Deployed APIs using GitLab CI/CD and Conducted API testing with Postman.

Juke Solusi Teknologi
Middleware & Database Engineer September 2021 – April 2022

- Developed REST APIs using TIBCO and Tested REST APIs using Postman.
- Created Docker images for REST API and deployed REST APIs to OpenShift.
- Monitored GCP (Compute Engine, SQL, IAM, Pub/Sub).

Education

University YARSI (2017-2021)
S1 Teknik Informatika - IPK 3,47

- Mentored Platform-Based Programming Course
- Served as an Android Development Tutor

SMKN 1 Cikarang Barat (2013-2016)
Major in Computer and Network Engineering
